

# Hilliard Bradley High School Showcase

We selected TableX because the use of custom product sizes and the ability to specify any laminate, matching custom edge color options. Working with the customer service team was effortless. They did all the work for us with pricing, drawings, freight and meeting critical lead times. We were able to get this information in a timely manner.

We were able to furnish a lecture hall, thirteen computer labs, conference rooms, and training rooms all with one vendor. The installation was great. The product came on a TableX truck; we had no damage and there were no punch list items on this product for the project.

The client was very happy with the tables and has ordered additional product from TableX since the project was completed.
